Project Status:

- Page assembly complete
- Cropping performed to specified printing area
- Trapping applied

Special Instructions:

File Data:

File Name: _____ Type: _____

File to be output: _____

Linked files: _____

Include all original application files of any EPS file used in the page layout file. Four color files should be set up as CMYK process color. Files must be created in QuarkXpress, PageMaker, or CorelDraw. Include crop and registration marks. Add 1/8" bleed beyond all final trim marks. Mark separated pages with appropriate process or spot PMS colors.

Scans:

Include all live EPS files, live scans/images, and original application files of any EPS files. Four color process work and black and white halftones should be 300 dpi (dots per inch). Color scans should be saved as CMYK. Line Art should be scanned at 1200 dpi minimum. Identify FPO (For Position Only) scans and identify the corresponding high resolution graphic or scan files to be output and include those files on the disk.

Note: Required printed material should not include country of origin references (Made in, manufactured in, etc.). In the event printed materials include country references/addresses (printed in USA, XYZ company, main street, anytown, state, USA): Technicolor will be required to imprint/label a country of origin marking on the exterior of the product.

Print Material: E-File Information Form

Proof(s) you require for approval:

Technicolor will inspect your image for printability before film output. If changes are required, specify approval proof type.

We require and will automatically output a contract proof from final film to approve printing process.
